APRICOT 2008 Workshop
Feb 20-25 – Taipei, Taiwan
Hervey Allen

nsrc@apricot2008
Taipei, Taiwan

What's it Do?

Software Configuration Management

- wiki for collaboration
- Interface to subversion for change management.
- Timeline for milestones, progress reports, etc.
- Ticketing system
- Integration with email

nsrc@apricot2008
Taipei, Taiwan

Installation

We'll create a fairly complex trac project...

- Multiple trac environment configuration.
- Authentication via trac not Apache.
- trac user admin via web interface.
- write-protected for anonymous users.
- Ability to add subversion later.
- Aztech calendar plug-in.

Taipei, Taiwan

trac: Some Details

- Let's look at the wiki...
- Let's look at the ticketing system...
- Let's look at different user views...
- Then we'll install.

nsrc@apricot2008

trac install and post install

Let's do the following:

- 1.) Install**
- 2.) Review the install**
- 3.) If time, do a few more exercises:**
 - **Add "TICKET_VEW" to the *anonymous* user profile.**
 - **Find a plugin you want and install.**
